Water; fructose; banana puree (antioxydant: ascorbic acid) (10,9%); honey (8%); glycerinum pollen extract (5%); royal jelly (1%); propolis extract (0,5%); acidifying: citric acid; thickener: xanthan gum; preservatives: potassium sorbate, sodium benzoate; sweetener: sucralose.

TRADITIONALLY KNOWN PROPERTIES OF THE MAIN INGREDIENTS

• Honey

It provides energy. Honey is particularly indicated in the diet of infants and children. It supports the growth supporting the efforts that it involves. It is traditionally known for its aromatic, energetic and soothing actions.

• Pollen

Fertilizing part of the flower, pollen is a natural substance extraordinarily rich (including minerals, amino acids ...) by its multi-floral origin. Pollen is traditionally known for its remineralizing, stimulating, revitalizing, toning and regenerating properties.

• Royal Jelly

Royal jelly is a honey bee secretion that is used in the nutrition of larvae during the first days of their lives, as well as adult queens throughout their existence.

Royal Jelly is a milky and jelly substance composed of elements that are essential: carbohydrates, protein, fat, vitamins, minerals and oligo-elements. The set is a concentrated nutrient rich which allows the royal jelly to be considered revitalizing, energizing and balancing.

Royal jelly is traditionally known for its stimulating and toning properties, with increase physical and intellectual capacities and increase stress resistance. It is traditionally recommended to combat tiredness in cases of fatigue and overwork.

• Propolis

Propolis is produced by bees from the buds and bark of trees to protect the hive from external aggressions. Properties of propolis are numerous: it has an antiseptic activity, exercising especially against bacteria and fungi, it would also have an antiviral activity. It is also traditionally known for its anti-inflammatory (stimulation of macrophages), healing (vitamins, amino acids and oligo-elements), anti-free radical (derived flavonoids and benzoic acid) and calming properties.

	For 1 dose of 10 ml
Honey	800 mg
Glycerinum pollen extract	500 mg
Royal jelly	100 mg
Propolis extract	50 mg

DIRECTIONS FOR USE

Before 5 years: take 5 ml (one teaspoon) per day, morning.
After 5 years: take 10 ml (about one tablespoon) per day, morning. Shake before use. Can be taken as it or diluted in water or another beverage.
